

## Project Data Sheet

*Sunnyvale, California*

**Title** Laris

**Location** Central and Wolfe Campus, Sunnyvale, California

**Description** This stone sculpture is made of granite and is one of four sculptures for the new leading-edge technological Central and Wolfe Campus in Sunnyvale, CA. Its elegant form is based on minimal geometries obtained from a single block of stone. Formal paradoxes at play include convex and concave, darkness and light as well as mirroring and translucency. These material states are achieved through a complex process of robotic milling. The sculptures are the centerpieces of intimate seating areas that ring the perimeter of the new campus.

**Date** 2018

**Medium** Granite

**Dimensions** 8'-1" H x 5'-6" L x 3' W

**Commissioned by** City of Sunnyvale, Arts Commission and the Jay Paul Company

**Engineer** Patrell Engineering Group, Inc., Glendora, CA

**General Contractor** Level 10 Construction, Sunnyvale, CA

**Subcontractor** Quarra Stone Company, Madison, WI
