

Project Data Sheet

Minneapolis, Minnesota

Title Urban Circle

Location 38th and 46th Street Stations, Hiawatha Light Rail Line, Minneapolis, Minnesota

Description Commemorating the history of the streetcar and classic bungalow architecture in Minneapolis, this bronze sculpture, located in the roof of the 38th St. Station, is a picture of changing urbanism. Through the inter-city connection of the new Hiawatha Light Rail line, a circle is drawn between the history of flight from the city to the suburbs, when street car transportation was abandoned, to the return of living and working in the city and the reestablishment of public transportation through light rail.

Date 2004

Medium Rolled bronze sheet, cast bronze

Commissioned by Hiawatha Public Art and Design Program

Architect Meyer Scherer and Rockcastle

Engineer Toltz, King, Duvall, Anderson and Associates, St. Paul, MN
Patrell Engineering Group, Inc., Glendora, CA
